## Using search feature

Posted by a3holerman - 2009/04/05 13:40

---

Hi,

New here and am just getting started with my first bin. I am trying to use the search feature so as to not ask the same questions. The problem is when I look at the first post then use the back arrow to go back to the search results it says "Web has expired" and I have to retype the search again. Any suggestions????

Tom

Cape Cod
